TechSmart® R81001 "Blue Spring" Fuel Pressure Regulator Upgrade Kit

Ford Excursion 6.0L 2004-03
 Ford F250 Super Duty 6.0L 2007-03
 Ford F350 Super Duty 6.0L 2007-03
 VIO over 726,000

The TechSmart® kit includes all the O-Rings and hard parts to rebuild the fuel filter housing.

With the TechSmart® R81001 kit installed, most see an increase of 10-15 PSI of fuel pressure. The added fuel pressure will help keep the injectors from out flowing the stock fuel pump, meaning no air in the injectors, and an injector that will live much longer.

Symptoms of a weak spring include hard starting, stalling, poor fuel mileage and poor acceleration.
