

# Give Your Customers Better Than OE

**It's What's Inside That Matters**

## **BWD Control Modules**

- State-of-the-art designs that meet or exceed OE specifications
- Copper slug heat sink provides better heat dissipation to prevent heat damage to the module
- Double wire bonds for better connections, greater dependability and longer life
- OE flip chip
- Electrostatic suppression diode (ESD) added for specific vehicle applications

## Give Them

# **BWD**®

**ENGINE MANAGEMENT TECHNOLOGY™**

BWD is committed to being the best. Whether it is spending more on research and development, or upgrading and expanding its product line, BWD works hard to earn your trust and loyalty. The only goal is to provide its customers with the finest service and technical online support along with an unmatched commitment to quality. BWD is constantly evolving to give customers the competitive edge they need to compete in today's ever-changing marketplace.
