

New Diesel Categories Including Fuel Injectors

For years, we've offered hundreds of parts in dozens of unique diesel engine management categories, and we've been a basic manufacturer in most of them. Now, we're proud to announce significant expansions to our diesel offering. We've added 100 new diesel parts, including several new product categories and line expansions to key existing categories.

The highlight is our new line of OE-production diesel fuel injectors. By partnering with **PurePower Technologies**—a world-class manufacturer of diesel injectors based in the U.S—we're able to be the first in the market to supply technicians with a new diesel fuel injector of this quality. Here are a few highlights from our new diesel injector line as well as several other new diesel categories.
