

BWD® Diesel offers hundreds of parts in dozens of unique diesel engine management categories, and we're a basic manufacturer in most of them. Demonstrating our commitment to diesel, we've added **110 new SKUs** to our diesel line, including several new product categories and an array of line expansions. Here are a few of the highlights:

**Diesel Fuel Transfer Pumps***4 SKUs Available*

The fuel injection pump can fail if the fuel transfer pump doesn't supply enough fuel pressure. To prevent premature failure, it's recommended to replace the fuel transfer pump while replacing the injection pump.

BWD's new Diesel Fuel Transfer Pumps come complete with everything needed for the job: a high-quality fuel transfer pump plus a jumper harness, fuel line banjo bolt seals, and mounting nuts and washers.
