

# DESIGNED FOR SPECIAL DELIVERY

## FUEL INJECTOR

Tin-Plated Brass Terminals

Stainless Steel Calibration Pin and Spring Assembly

High-Temperature Viton® External O-rings

Precision Wound and Trimmed Solenoid Coil Windings

Leak-Proof Valve Seats

No Internal O-rings

### LASER-DRILLED METERING HOLES

Our fuel injectors are flow-matched to each specific application, with advanced laser-drilled metering holes that deliver

precise flow and spray patterns for proper injector performance under all conditions. Manufactured in our TS16949 certified, Greenville, SC facility, our injectors are 100% tested for coil resistance, injector leak, insulation resistance, static and dynamic flow. It all adds up to the performance you expect from the import leader by design.
