

# REPLACES ONLY THE DAMAGED PART.

## Ditto.

Over time, the OE flap on a DISA Valve becomes stripped, resulting in rough idle, loss of power and a DTC. Rather than replace the entire assembly, TechSmart® repair kits let you simply replace the damaged flap. It's the smarter, faster, and more economical repair – naturally.

### TechSmart® DISA Valve Repair Kit

- Kit comes complete with a new flap, flap hinge, hinge pin, retaining clip, O-ring, and extractor screw
- Save time and money by replacing only the original damaged flap and not the entire assembly

*The Evolution of Parts*

Sea stars can replace lost arms.  
This is referred to as regeneration.
